

Perfect (mig/mag DC)

Perfect

Röwac Perfect welding is a new experience. The machine distinguishes itself by the professional approach to both its construction and assembly. Today's professional needs speed, certainty and optimum weldability, even at maximum set values. This professional approach helps the welder to adopt a high quality standard, something which nowadays is unthinkable. All this is not just a matter of setting wire and voltage, but consistently applying the best parts for the entire welding machine. The Röwac Perfect professional series in the range of 260 to 500 amps, available as a compact machine or with a separate 90 degree rotating wire feed unit. The whole package is built in a solid steel frame. The other components are unique as well: 60% duty cycle at nominal load, application of a new ventilation system without fan, better ease of use by using large control buttons, large wire feed rollers for trouble-free wire transport, less pollution within the machine and no noise pollution.

Technology: conventional
supply: 3-phase
Type: mig/mag DC

Perfect (mig/mag DC)

Type		P-26	P-33	P-41	P-51
welding amperage (I2min.-I2max.) mig/mag	A	30-260	35-330	35-400	35-500
Open voltage mig/mag	V	16-34	17-43	17-48	17-53
Duty cycle 100 % mig/mag	A	200	250	310	390
Duty cycle 60 % mig/mag	A	260	330	400	500
ppy					
Grid voltage (50/60 Hz) 3-fase	V	3x400	3x400	3x400	3x400
Max. input voltage	kVA	9,9	14,5	19	28
Machine					
Fuse	A	16	25	35	50
Protection class		IP23	IP23	IP23	IP23
Insulation class		H	H	H	H
cooling		F	F	F	F
dimen					
Weight	kg	108	123	157	172

Accessories:

- grounding cable
- elding torch mig/mag
- Reduction valve
