

200 hf/p (dc-hf-p)

200 HF/P

The 200 HF/P is a complete and very reliable TIG welding machine that meets the needs of the most demanding professionals due to its high level technology. It features a latest-generation microprocessor that makes this machine both technically very advanced and user-friendly. The always optimal ignition, perfectly stable arc and the completeness of the TIG functions make this generator a winner in its category. In addition, the procedures during the design phases, the checks and the final inspection guarantee maximum reliability of the machine and limit the chance of defects after sale.

Technology: Inverter
Supply: 3-phase
Type: TIG

200 hf/p (dc-hf-p)

Type		200 hf/p
Welding		
Welding scope (I2min.-I2max.)	A	5-200
Unloaded voltage MMA	V -DC	65
Unloaded voltage TIG	V	14
Duty cycle 100%MMA	A	130
Duty cycle 40%MMA	A	200
Duty cycle 100% TIG	A	130
Duty cycle 40% TIG	A	200
Supply		
Supply voltage 3 (50/60 Hz)	V	3x400V (50-60Hz)
Grid tolerance	%	15
Max intake power 100%	kVA	6,2
Max intake power 40%	kVA	10
Intake amperage I1(100%)	A	9
Intake amperage I1(40%)	A	14,5
Power factor	cos phi	0,85
Fuse	A/tr	10
Machine		
Construction norm		EN60974-1 / EN 50199
Protection norm		IP 23
Insulation class		H
Cooling method		AF
Weight	kg	10
Dimensions	mm	160x400x260

Accessories:

- welding cable
- grounding cable
- tig torch
- remote control
